

I would like to voice my opinion against NAB's petition 04-160. I support Satellite Radio and the variety of programming that it offers to me. I pay each month for the right to hear a variety of programming from XM. I depend on our government officials to respect my right to choose to listen to satellite radio. It should be up to XM and SIRRIUS to offer us as many programs as they need in order to attract listeners. Any attempt by the NAB to restrict the services which Satellite Radio offers would provide a dis-service to the public. Thank you for respecting our right to the programming we enjoy. Please reject HR-4026

Sincerely,

Gordon Gross
